Bio

Joseph Faisal Nusairat, author of Beginning JBoss Seam , is a Java developer who has been working full time in the Columbus Ohio area since 1998, primarily focused on Java development. His career has taken him into a variety of Fortune 500 industries including military applications, data centers, banking, internet security, pharmaceuticals, and insuranse. Throughout the experience he has worked on all varieties of application development from design, to architecture, to development. Joseph, like most Java developers, is particularly fond of open source projects and tries to use as much open source software as possible when working with clients.

Joseph is a graduate of Ohio University with dual degrees in Computer Science and Microbiology with a minor in Chemistry. While at Ohio University, Joseph also dabbled in student politics and was a research assistant in the virology labs.

Currently, Joseph works as a Senior Partner at Integrallis Software (www.integrallis.com). In his off-hours he enjoys watching bodybuilding and Broadway musicals, but not at the same time.
